SATCO Products, Inc. Expands Energy Efficiency to the Lighting Industry

Brentwood, NY – July 7, 2009 – SATCO Products, Inc., a 2009 ENERGY STAR Partner of the Year in the lighting manufacturing category, announced the expansion of its national distribution and customer service network. The expansion follows SATCO’s acquisition of the assets of the Hygrade Lamp Company in late 2008, which expanded the assortment of the company’s high performance, energy-efficient lighting products it offers to the industrial and commercial lighting industry.

With the addition of resources from the Hygrade Lamp Company, SATCO now warehouses and ships products from 18 locations nationwide including: Los Angeles, California; San Francisco, California; Denver, Colorado; Miami, Florida; Jackson, Mississippi; St. Louis, Missouri; Brentwood, New York; Syracuse, New York; Charlotte, North Carolina; Cincinnati, Ohio; Portland, Oregon; Boston, Massachusetts; San Juan, Puerto Rico; Memphis, Tennessee; Nashville, Tennessee; Dallas, Texas; and Seattle, Washington.

SATCO’s widespread network of shipping locations reduces lead time for retailers and electrical distributors. Its warehouses stock a wide variety of lighting products, providing a “one stop shopping” solution for customers who want to consolidate their vendors. Timely order fulfillment is a cornerstone of its business.

The SATCO HYGRADE brand offers long-lasting quality products that not only reduce energy and maintenance costs, but decrease user impact on the environment.

“Energy efficiency has always been at the forefront for SATCO,” stated Bill Gildin, President of SATCO Products, Inc. “With our expanded distribution network, we are able to provide lighting solutions to meet the energy efficiency requirements of customers around the U.S.”

About SATCO Products, Inc.

SATCO, established in 1966, manufactures and distributes a wide variety of lighting products to an international lighting and electrical market. SATCO was named the 2009 ENERGY STAR Partner of the Year in the lighting manufacturing category, as well as 2008’s “The Best of the Test” by the Good

Housekeeping Research Institute. Under the SATCO brand (www.satco.com) the company's product categories include incandescent, halogen, fluorescent, HID and energy-efficient lamps. SATCO also offers lighting and electrical components for the retail, commercial and manufacturing trade and consumer products such as night lights, desk lamps, and surge protectors. In June 2005, SATCO launched a new line of decorative and functional lighting fixtures sold under the NUVO brand (www.nuvolighting.com). The NUVO product line is strongly focused on energy efficiency with nearly 600 product styles which are ENERGY STAR qualified. An additional 2100 products service the decorative and light commercial markets.
